## TRUE STEEL SECURITY

 **Security Pro**

DEALER OF THE YEAR  
2 TIME WINNER 2003 & 2004

*Security Is A Family Matter™*

## TRUE STEEL NOW!

### THE NEXT GENERATION IN SECURITY IS HERE AND ONLY TRUE STEEL HAS IT!

Traditional burglar alarms offer protection only when the system is armed. **TRUE STEEL NOW** services allow you to control your security system and receive instant notifications anytime, anywhere. If you want, we can even add affordable cameras to allow you to have a live view of your premise from anywhere or to receive video clips of specific activity.

#### Homeowners, would you like to:

1. Be notified when potentially hazardous areas in your home such as liquor, medicine and gun cabinets are accessed?
2. Be notified when your children have arrived home safely and know whether or not anybody came home with them?
3. Know when contractors or cleaners come and go?
4. Be able to view all activity on your system's sensors even when the system is disarmed?
5. Be notified if a door or window is left open at times when it should not be?
6. Be notified if a child's bedroom window is opened during the night?
7. Be notified when someone accesses the pool area?
8. Arm & disarm your system using your PDA or computer?

#### Business owners, would you like to:

1. Track customer traffic at your business?
2. Be automatically notified when your alarm is not armed at a specific time?
3. Access a two-month history of all activity on your alarm?
4. Know that staff is arming and disarming the system when they should be?
5. Know when a restricted area is accessed, even when your alarm is disarmed?
6. Easily add, remove and change user codes without having to use the keypad or call us for help?
7. Know when an employee bypasses protection of a certain area when arming the security system?
8. Arm & disarm your system using your PDA or computer?

**TRUE STEEL NOW** can do the above and much more. Many of our clients can obtain these services without replacing their existing systems. Call us today to find out more.

# New Technology Helps Keep Seniors In Their Homes

**Care Link** ADVANTAGE is a new and innovative service that will help families to keep their parents or loved ones with special needs living independently, in their own home. This service will also help to address the current ALC bed crisis our hospitals are currently struggling with.

## We have real concerns when a vulnerable loved one is living alone!

- ✓ Are they taking their medication when they should?
- ✓ Are they taking the right medication?
- ✓ Are they eating properly?
- ✓ Are they sleeping properly?
- ✓ Are they wandering outside of the home when they should not be?
- ✓ And perhaps the biggest concern of all... Are they "Up & About" or have they had a problem and can't push their emergency pendant to call for help?

## Care Link Advantage can help:

- ✓ Keep your loved ones in their own home rather than move them into a retirement, assisted living, or nursing home.
- ✓ Reduce in home care visits by as much as 50%.
- ✓ Save you money!
- ✓ Give your loved ones their independence back.
- ✓ Increase the quality of care you currently give your loved ones, but at the same time allow you to relax and enjoy your life without the constant worry and guilt that often comes with caring for a loved one.

## How?

Your loved one's role is passive. They simply continue to live, as they always have in their own home. As the caregiver, you continue to live your life, knowing that if anything is wrong, the system will contact you and the other caregivers immediately, no matter where you are, with specific information as to what the problem is. Notifications can be sent via e-mail to your PDA, text message to your cell phone, or voice messages to any phone or cell phone.

Care Link Advantage cannot prevent your loved one from having an emergency situation, but should one occur, it can notify you right away so you can act on it immediately.

Care Link Advantage cannot prevent your loved one from aging, but it can give you vital information such as eating, sleeping and washroom patterns, as they age. With this information you can take action to head off and prevent many unnecessary complications that can lead to deteriorating health and hospitalization.

If you are concerned about a loved one we would be glad to discuss how we can help.

## Save the Trees Win a Prize!

Help us reduce our environmental footprint by changing your newsletter and invoice delivery to e-mail or switching your invoicing to pre-authorized payment. Everyone who does so by the end of May will be entered into a draw for 3 months of free monitoring services at one location. Call 674-0116 or (800) 667-5919 or e-mail [mborton@northerncom.com](mailto:mborton@northerncom.com) for your chance to win.

## Carbon Monoxide Detectors Save Lives

We've all heard about the deaths that have occurred in the past few months in Northeastern Ontario as a result of Carbon Monoxide poisoning. If you have not already done so, please buy a carbon monoxide detector today! If your existing CO detectors are more than five years old, they should be replaced.

We offer monitored Carbon Monoxide detectors that can relay a signal to us when they go off. This ensures that help will be dispatched if you have been overcome by this lethal gas.

## Position Available - \$15/hr

The Northern Communications Emergency Dispatch Centre is currently hiring. We are seeking candidates who are computer literate, possess keyboard skills, are bilingual, willing to work shift work and have some post-secondary education. Compensation is \$15/hr. upon completion of training. If you meet this criteria, please send or drop off your resume, attention Cindy Schroeder, to:

230 Alder St.

Sudbury, ON P3C 4J2
