

The First Step in Digital Surveillance

Digital Video Solutions

Move Up to Digital Recording Without Straining Your Budget

Professional Performance at Entry-Level Cost

If you've put off buying a Digital Video Recorder (DVR) because you couldn't justify the cost, now is the time to upgrade – with a Digia™ II DVR. Our Digia video surveillance platform can make your productivity soar because its technology is faster, more accurate, more versatile, and in many ways simpler than that of older video surveillance systems, providing better security with less effort. Plus, our systems are easy to set up and work right out of the box. Once you upgrade to a digital

system, you'll wonder why you didn't replace your analog recording equipment sooner.

Digia II MPEG-4 Digital Recorders

All three models of our Digia II digital video recorders offer exceptional value. Digia II comes in 4-, 9-, and 16-channel models that hold 30 days or more of recorded video. They can simultaneously view live images, play stored files, and record new video. Our digital technology also gives you the convenience of remote configuration, viewing, searching, and playback from almost any computer with a LAN, WAN, or Internet connection.

The Small-Business Solution with Big Features

Feature-rich for its price range and ready to work right out of the box, Digia II configures quickly and has a sensible control layout. Its simple, sleek design incorporates serious performance, and is ideal for the following applications:

Convenience Stores

Gas Stations

Restaurants

Advanced Features for Enhanced Security

Advanced Video Capabilities

Capture high quality video at speeds up to 120 frames per second. Watch live video or playback recorded footage.

Power, Size and Speed

Choose from a 160GB, 320GB or 640GB (available only in the 16-channel model) hard drive. MPEG-4 file compression maximizes drive capacity while retaining image quality and speeds streaming of video over your network.

Easy Access, Total Control

Digia Browser software, which comes bundled with the Digia II, puts you at the controls of a remote computer with a simple and secure browser-based interface. Connect remotely with a LAN, WAN or Internet connection.

Easy In, Easy Out

The Digia II DVR effortlessly integrates a variety of input and output components, including:

DigiaCam Analog Cameras

Connect up to 16 cameras

Alarm Sensors

Inputs can be used for a variety of alarm devices

Audio Input/Audio Output

The Digia II features an audio input and output

USB 2.0 Support

Export to a flash drive, external CD, DVD or hard drive through a front-access USB port

Alarm Indicators

Monitor alarm sensor status and respond to alarm notifications

Monitors

Connect a VGA, or Composite BNC monitor for playback and live viewing
